Dear Doctors Sente & Ferraro:

It is with my deepest gratitude that I write this letter to thank you and your caring and dedicated staff for all you did to make me pain free and able to live an active lifestyle again.

When I came to you after four months of prior treatment, I was still in severe pain in my lower back and leg and contemplating surgery. I couldn't perform even the simplest of activities without assistance and was falling into a deep depression because of it. I felt that my life was over and that I would never be able to do anything again.

My daughter told me about the Accu-SPINA System and said that it was worth a try to see if it would help. I met with Dr. Ferraro and was told that I was a good candidate for this type of therapy and that he felt strongly that I would get the relief that I needed. After 4 or 5 treatments on the machine, coupled with physical therapy, my pain lessened and, before the end of the program, I felt better than I had felt in years. I was able to do things that I had not been able to do for years. It was hard to believe that I was pain-free and that the IDD Therapy was painless and non-surgical. Who would have thought that something so easy could make such a difference in my life.

Thanks again.....I will be forever grateful.

Sincerely,

Marie Andreozzi
